Bouvier, Boerboel, Doberman, Rottie, Alaskan Malamute, Samoyed, Bearded Collie, Golden Retriever, Pyrenean Mountain Dog	Nr 10	111	120x65x85	

PLEASE NOTE

According to IATA animal air travel, the above is a guideline and not all inclusive. The size of the crate is dependent on the animal's body size.

The animal must be able to stand up straight and turn around inside the container. There must be a 4 finger space above the animal, to prevent the head or standing ears from touching the roof of the crate.

Snub nose animals must be carried in a 2 size bigger crate than the body size suggests. This is to assist with better ventilation due to the fact that Snub nose animals struggle to breath by nature.
